(1) For any two atomic sentences P and Q, is the following sentence true? Why?

$$(P \Longrightarrow Q) \Leftrightarrow (\neg \ P \lor Q)$$

(2) 用一阶谓词逻辑解答如下问题。已知:张三在哪里,李四也总跟到哪里。现在知道张三在公园,问李四在哪里?

用一阶谓词逻辑表达,上述陈述可以写为:

$$\forall x (At(张三, x) \Rightarrow At(李四, x)) = True$$

问: At(李四,?)
